SENDING UP A SIGNAL FLARE

(Mr. ROSKAM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROSKAM. Mr. Speaker, I rise today to send up a signal flare about a grievous concern that has foisted itself upon this Nation from the Obama administration, and that is this: the Obama administration is now going up to communities of faith and poking their chest and saying, either you will change the dictates of your conscience, or we will fine you. We will use the long arm of the Federal Government to manipulate you into our view of the world, not the view of the world that you think is bestowed upon you by God.

Mr. Speaker, that is a grievous error. That is a provocation that needs to be answered, and, in a nutshell, we have a foreshadowing of what happens when that isn't answered. It's a foreshadowing that comes in the form of a quote from Pastor Martin Niemoller, an anti-Nazi activist, who said:

First they came for the Jews, and I didn't speak out because I was not a Jew.

Then they came for the Communists, and I didn't speak out because I was not a Communist.

Then they came for the trade unionists, and I didn't speak out because I was not a trade unionist.

And then they came for me, and there was no one left to speak out for me.

Mr. Speaker, it's time for this country to rise and to speak out and to push back on this outrageous provocation from the Obama administration.

HIGH-LEVEL NUCLEAR WASTE

The SPEAKER pro tempore. Under the Speaker's announced policy of January 5, 2011, the gentleman from Illinois (Mr. SHIMKUS) is recognized for 60 minutes as the designee of the majority leader.

Mr. SHIMKUS. Before my Pennsylvania friends get all freaked out, I appreciate you letting me come to the floor for 5 minutes to do what is now a weekly constitutional of mine and talk about high level nuclear waste in Yucca Mountain.

What I have been doing, to set the stage, is going around the country highlighting locations where there's nuclear waste throughout this country, and just making the statement that it is in the national interest, and actually it's national Federal law that this waste be consolidated in a centralized storage facility. And so with that, I'll begin.

Today we're headed to the great State of Minnesota, and we're looking at a nuclear power plant called Prairie Island. Now, Prairie Island has 725 million tons of uranium, of spent fuel, on-site. Prairie Island has waste stored above the ground in pools and dry casks.

Prairie Island is in the Mississippi River floodplain, as you can see from

the photo here. And Prairie Island is 50 miles from the Twin Cities.

Now, where should this waste be? Well, this waste should be where an 1982 energy policy, the Waste Policy Act, and then the amendments in 1987 said, by Federal law, it should be, which is underneath a mountain in a desert. And where is that mountain? The mountain's called Yucca Mountain.

Currently, after \$15 billion spent researching and preparing the site, we have zero nuclear waste onsite. If we were storing the nuclear waste there, it would be 1,000 feet underground. It would be 1,000 feet above the water table, and it would be 100 miles from the nearest body of water, which would be the Colorado River.

Now, look at the difference between Yucca Mountain, 100 miles from the Colorado River, versus nuclear waste right next to the Mississippi River, actually in the Mississippi River floodplain.

So, why aren't we doing what the law has dictated? Well, we have the majority leader of the Senate who's been blocking funding and stopping any movement to do the final scientific study. In fact, the will of the House was spoken last year when we voted, I think, 297 votes, bipartisan votes, to complete the funding and the study.

So let's look at the Senators from the region of where this nuclear power plant is. And it's very curious: The two Senators from Minnesota, Senator KLOBUCHAR and Senator FRANKEN, they're silent. They're silent on nuclear waste in their own State. It's very curious. Not only nuclear waste, but nuclear waste on the river.

And then you go to North Dakota. Senator CONRAD has voted "no." Senator HOEVEN supports it.

South Dakota, Senator JOHNSON voted "no." This is all in the region.

Senator THUNE supports. Senator NELSON votes in support of Yucca Mountain. Senator JOHNSON votes in support of Yucca Mountain.

Now, Minnesota has two sites, three reactors; two of them are right in this location. So, as I've been coming down to the floor, if you add these new Senators to the total tally, right now we have 40 Senators who have expressed support for moving high-level nuclear waste. We have 12 who are curiously silent on nuclear waste in their State or in their region, and we have 10 who have stated a position of "no."

It's in the best interest of our country, for the safety and security of this country, that we consolidate in a centralized location, underneath a mountain, in a desert, in the defined spot by law, which is Yucca Mountain.

And again, I want to thank my colleagues and friends from Pennsylvania for allowing me to intrude upon their hour.

I yield back the balance of my time.

COMMEMORATING ARIZONA'S CENTENNIAL ANNIVERSARY

The SPEAKER pro tempore. Under the Speaker's announced policy of January 5, 2011, the gentleman from Arizona (Mr. FLAKE) is recognized for 56 minutes as the designee of the majority leader.

Mr. FLAKE. Mr. Speaker, I rise today to commemorate a milestone in Arizona's history, the centennial of our great State. After nearly 49 years as a U.S. Territory, Arizona became part of the United States on February 14, 1912.

Today Arizona is a bustling, contemporary oasis of more than 6 million people. Its natural wonders—the Grand Canyon, the Petrified Forest, the Red Rocks of Sedona, the Painted Desert, coupled with modern conveniences, most notably air-conditioning—draw millions of visitors from around the world every year. But it wasn't always so.

Early settlers, ranchers, farmers, and miners had to wonder what they'd gotten themselves into. Such was the case with my ancestors. Allow me to tell a sliver of their story because it tells a little about Arizona's history.

William Jordan Flake, my great-great-grandfather arrived in Arizona territory in 1878. When he bought a ranch on the Silver Creek, he was warned by the previous owners not to invite any other families because the land and water would not sustain them. Fortunately, he didn't listen. Soon the town of Snowflake was born, becoming the hub of activity in what was then Arizona territory.

Not long after, William Jordan's son, James Madison Flake, was deputized, along with his brother, Charles Love Flake, to arrest an outlaw who had drifted into town. As they disarmed the outlaw, the outlaw reached into his boot, drew a weapon, and shot Charles in the neck, killing him instantly. James received a bullet in the left ear before returning fire, killing the outlaw.

Just 3 years later, James Madison Flake sat at the bedside of his beloved wife as she passed away, leaving him with nine children. "Once again I must kiss the sod and face a cloudy future," he poignantly wrote in his journal.

□ 1140

But like so many other pioneers who settled Arizona, he not only faced the future, he shaped it. Along with raising these children and many others that would come later, James Madison Flake involved himself politically in the issues of the day. Notably, he tells in his journal of attending numerous meetings and conventions around Arizona and Colorado to promote the cause of women's suffrage. No doubt, he was proud when, just after Statehood in 1912, Arizona became the seventh State to approve the right of women to vote. Just a few years later, the Nation followed with the 19th amendment to the Constitution.

James Madison Flake would be proud to know that Arizona has many women
